

## Introducing **Mobile Alert**, the Anytime, Anywhere, Safety Call System

Traditional medical alert systems are designed to work within the home, and are limited by range. Therefore, if assistance or help is needed when you are outside of your home, the traditional push button system will not work.

Mobile Alert works anytime you need it, anywhere in the country. Mobile Alert can be worn on the wrist or as a pendant. It is a cellular communicator with safety call buttons.

### ***Mobile Alert includes:***

- Safety button: Mobile Alert can send an alert to family, caregiver, assisted living facility and emergency operators from nearly anywhere.
- Simplicity of design: Large, easy to use buttons and comfortable wrist-band
- Integrated Audio: Remotely establish a clear, stable 2-way, voice connection.
- 24-hour monitoring center staffed by licensed emergency medical technicians.

Introducing **myHalo**, the product that employs innovative technology and

intelligent wearable sensors for automatic fall detection, offering peace of mind for seniors and their families.

***myHalo features include:***

- Seniors can choose to have their loved ones respond first...before EMS is dispatched
- No conscious action needs to be taken by the senior; automatic monitoring
- Advanced fall detection alerts
- No computer required
- Tracks vital signs, activity, asleep and awake patterns
- 24/7 call center monitoring
- Cell phone, text messages and e-mail alerts
- Easy to read Web interface
- Comfortable wireless monitoring strap
- Panic button included
